

## **OGPL crosses 500MW in operating capacity**

**Orient Green Power Company Limited (OGPL)** has announced that its operating capacities now exceed 500 MW.

Following the recent commissioning of 3 Biomass units in Narsinghpur (MP) – an unit of the company and Kishanganj, (Rajasthan) and Marikal (AP) units through its subsidiaries, the on ground operational capacity of the Company now exceeds 500 MW, further cementing its position as one of the leading player in the renewable energy space. As of date, the Company's operating capacity stands at 502 MW comprising 416 MW of Wind assets and 86 MW of Biomass assets.

To further consolidate its presence, OGPL is on track to commission a further 40 MW of capacity across both verticals. It is also keenly evaluating major opportunities arising in the space especially wind business, which could further propel its growth of the business.
